

The air conditioning request relay works in conjunction with Ron Francis Wiring part number AR-27, AR-28, AR-77 & AR-78 cooling fan sensor systems. Adding this relay to the system allows the temperature sensor to be overridden when the A/C compressor clutch is engaged, turning on the electric cooling fan..

INSTALLATION INTO THE EXPRESS WIRE SYSTEMS USING THE AR-27 & AR-28 WIRE KITS

Mount the relay next to the Express fuse panel. Connect the dark green wire to #F on the Express fuse panels using the blue fork terminal supplied. Connect the black wire to a good chassis ground using the ring terminal supplied. Splice the purple wire to the wire running from your air conditioning system to the compressor clutch.

INSTALLATION WHEN USING THE AR-77, AR-78, AR-73, AR-74 WIRE KITS

Splice the dark green wire from this kit to the dark green wire running from the cooling fan relay. Connect the black wire to a good chassis ground using the ring terminal supplied. Splice the purple wire to the wire running from your air conditioning system to the compressor clutch.
